

Aloysia
Simplified standard protocol: SSP/ALO/1

Examination office:	Naktuinbouw	
Reference of the protocol:	SSP/ALO/1	
Date of preparation of the protocol:	29/12/2022	
Date of entry into force of the protocol:	31/03/2022	
Botanical taxon:	Aloysia citrodora Paláu	
Common Name (when known):	Lemon-verbena	
Way of propagation of the plants to be examined:	Self or cross pollinated seed propagated <input type="checkbox"/> Vegetatively propagated <input checked="" type="checkbox"/>	
Number of growing cycles:	1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> Other <input type="checkbox"/> specify	
List of grouping characteristics:	Yes <input type="checkbox"/> if yes put as annex No <input checked="" type="checkbox"/>	
Minimum number of plants in trial:	Vegetative:20	Seed: -
Minimum number of plants observed by measuring or counting:	Vegetative:1	Seed: -
Give description of when observations should take place:	Observation should take place: after 6 months of growing in the test facility	
Uniformity: <ul style="list-style-type: none"> - For the assessment of uniformity of vegetatively propagated, self-pollinated seed propagated varieties or F1-hybrids, a population standard of 1% and an acceptance probability of at least 95% should be applied. In the case of a sample size of 20 plants, 1 off-type is allowed. - For the assessment of uniformity for cross-pollinated varieties, the recommendations for cross-pollinated varieties in the General introduction of UPOV should be applied. The variability within the variety should not exceed the variability of comparable varieties already known. 		
Table of characteristics:	Present <input checked="" type="checkbox"/>	

	Not available <input type="checkbox"/>
Literature: (when present, please annex to this document)	Present <input checked="" type="checkbox"/> Absent <input type="checkbox"/>

Table of characteristics: Aloysia

1. Plant: growth habit
2. Plant: height
3. Plant: attitude of lateral branches in relation to main branch
4. Leaf blade: length
5. Leaf blade: width
6. Leaf blade: shape
7. Leaf blade: shape of base
8. Leaf blade: shape of apex
9. Leaf blade: colour of upper side RHS Colour Chart (indicate reference number)
10. Leaf blade: anthocyanin colouration of upper side
11. Leaf blade: density of serration
12. Leaf blade: undulation of margin
13. Leaf blade: shape in cross section
14. Leaf blade: curvature of longitudinal axis
15. Petiole: length
16. Petiole: colour
