

## Senecio Simplified standard protocol: SSP/KKR/1.rev

Botanical taxon: Senecio candidans DC.

Common Name (if known): Groundsel
Date of preparation of SSP: 07-09-2017
Date of revision of SSP: 01-01-2020
SSP revised by: W.A. Wietsma

Sample to be examined: VEGETATIVE

Number of foreseen growing cycles: 1 year

Closing date for applications: 1/12Submission date/period: 1/3 - 31/3

Plant quantity: 24 young plants, able to show all their

characteristics in the first year of examination

Special conditions sample: None

Test station address: Naktuinbouw, Sotaweg 22, 2371 AA,

Roelofarendsveen

Name: Team Support Variety Testing Department

E-mail: <u>teamsupport@rasraad.nl</u>

List of grouping characteristics: NO

Minimum number of plants in trial: Vegetative: 20

Minimum number of plants observed

by measuring or counting: Vegetative: 1

Give description of when observations on the flower should take place: Not applicable Give description of when/where observations on the leaf should take place: In autumn

Test will take place: GREENHOUSE

Uniformity: A population standard of 1% with an acceptance probability of at least 95%. Number of Off-types allowed: one off-type allowed in a sample size of 24

Table of characteristics: PRESENT (see annex)

(if present, please annex the table of characteristics and explanations)

Literature: PRESENT (see annex)

(if present, please annex to this document)

## Table of characteristics Senecio candidans DC.

Plant: height Plant: width Plant: attitude Stem: colour (RHS) Stem: pubescence (absent/present) Petiole: length Petiole: thickness Petiole: colour (RHS) Petiole: pubescence (absent/present) Leaf blade: length Leaf blade: width Leaf blade: colour upper side (RHS) Leaf blade: pubescence upper side (absent/present) Leaf blade: colour lower side Leaf blade: pubescence lower side (absent/present) Leaf blade: shape Leaf blade: shape of apex Leaf blade: shape of base Leaf blade: margin
