

Ageratina
Simplified standard protocol: SSP/AGT/1.rev

Examination office	Naktuinbouw	
Reference of the protocol	SSP/AGT/1.rev	
Date of preparation of the protocol	10/09/2021	
Date of entry into force of the protocol	10/09/2021	
Botanical taxon:	Ageratina altissima	
Common Name (when known):	Snakeroot	
Way of propagation of the plants to be examined	Self or cross pollinated seed propagated <input type="checkbox"/> Vegetatively propagated <input checked="" type="checkbox"/>	
Number of growing cycles:	1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> Other <input type="checkbox"/> specify:	
List of grouping characteristics	Yes <input type="checkbox"/> if yes put as annex No <input checked="" type="checkbox"/>	
Minimum number of plants in trial	Vegetative:20	Seed: -
Minimum number of plants observed by measuring or counting:	Vegetative:1	Seed: -
Give description of when observations should take place	Observation on the flower should take place: at full flowering Observation on the leaf should take place: at full flowering Other observations should take place: at full flowering	

<p>Uniformity:</p> <ul style="list-style-type: none"> - For the assessment of uniformity of vegetatively propagated, self-pollinated seed propagated varieties or F1-hybrids, a population standard of 1 % and an acceptance probability of at least 95% should be applied. In the case of a sample size of 20 plants, 1 off-types are allowed. - For the assessment of uniformity for cross-pollinated varieties, the recommendations for cross-pollinated varieties in the General introduction of UPOV should be applied. The variability within the variety should not exceed the variability of comparable varieties already known. 	
Table of characteristics	Present <input checked="" type="checkbox"/> Not available <input type="checkbox"/>
Literature (when present, please annex to this document)	Present <input checked="" type="checkbox"/> Absent <input type="checkbox"/>

Table of characteristics: Ageratina

1. Stem: length
2. Stem: anthocyanin coloration
3. Leaf blade: length
4. Leaf blade: width
5. Leaf blade: ratio length/width
6. Leaf blade: position of broadest part
7. Leaf blade: intensity of green colour of upper side
8. Leaf blade: intensity of green colour of lower side
9. Leaf blade: anthocyanin coloration
10. Leaf blade: pubescence of upper side
11. Leaf blade: dentation
12. Leaf blade: shape of apex
13. Corymb: length
14. Corymb: width
15. Pedicel: length
16. Pedicel: pubescence
17. Flower head: length
18. Flower head: diameter
19. Involucrum: colour
20. Pappus: colour
21. Tubular flower: length
22. Tubular flower: colour RHS Colour Chart (indicate reference number)
21. Style: length
22. Style: colour
