

Passiflora
Simplified standard protocol: SSP/PSF/1

Examination office	Naktuinbouw	
Reference of the protocol	SSP/PSF/1	
Date of preparation of the protocol	01/09/2021	
Date of entry into force of the protocol	01/09/2021	
Botanical taxon:	Passiflora L. Passiflora caerulea L. Passiflora x kewensis Goldring Passiflora x belotii hort. Exc Pépin	
Common Name (when known):	Passionflower Passiflora caerulea L. Passiflora x kewensis Goldring Passiflora x belotii hort. Exc Pépin	
Way of propagation of the plants to be examined	Self or cross pollinated seed propagated <input type="checkbox"/> Vegetatively propagated <input checked="" type="checkbox"/>	
Number of growing cycles:	1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> Other <input type="checkbox"/> specify Click or tap here to enter text.	
List of grouping characteristics	Yes <input type="checkbox"/> if yes put as annex No <input checked="" type="checkbox"/>	
Minimum number of plants in trial	Vegetative:20	Seed: -
Minimum number of plants observed by measuring or counting:	Vegetative:1	Seed: -
Give description of when observations should take place	Observation on the flower should take place: at full flowering Observation on the leaf should take place: at full flowering Other observations should take	

	place: at full flowering
<p>Uniformity:</p> <ul style="list-style-type: none"> - For the assessment of uniformity of vegetatively propagated, self-pollinated seed propagated varieties or F1-hybrids, a population standard of 1 % and an acceptance probability of at least 95% should be applied. In the case of a sample size of 20 plants, 1 off-types are allowed. - For the assessment of uniformity for cross-pollinated varieties, the recommendations for cross-pollinated varieties in the General introduction of UPOV should be applied. The variability within the variety should not exceed the variability of comparable varieties already known. 	
Table of characteristics	Present <input checked="" type="checkbox"/> Not available <input type="checkbox"/>
Literature (when present, please annex to this document)	Present <input checked="" type="checkbox"/> Absent <input type="checkbox"/>

Table of characteristics: Passiflora

1. Leaf blade: shape
2. Leaf blade: number of lobes
3. Leaf blade: colour of upper side
4. Leaf blade: colour veins of lower side
5. Flower bud: colour
6. Flower: diameter
7. Sepal: length
8. Sepal: main colour of upper side
9. Petal: main colour of upper side
10. Petal: main colour of lower side
11. Corona filaments: diameter
12. Corona filaments: curl of the filaments
13. Corona filaments: diameter
14. Upper corona filaments: number of colour
15. Upper corona filaments: main colour
16. Upper corona filaments: secondary colour
17. Upper corona filaments: colour pattern secondary colour
18. Upper corona filaments: third colour
19. Upper corona filaments: colour pattern third colour
20. Lower corona filaments: number of colour
21. Lower corona filaments: main colour
22. Lower corona filaments: secondary colour
23. Lower corona filaments: colour pattern secondary colour
24. Lower corona filaments: third colour
25. Lower corona filaments: colour pattern third colour
26. Style: main colour
27. Style: colour patern
28. Stigma: colour
